

VALDIVIESO

Varietal Wines

The main idea behind the varietal line is to guarantee that the fruit aromas and flavors and the original nature of each grape variety will prevail above other characters.

Valdivieso varietal wines are fermented in stainless-steel tanks under tight temperature controls to protect the aromas and flavors in the wines. A small percentage of these wines are aged briefly in oak barrels to provide a greater complexity and to add depth to the fruit. This range offers many noble French grape varieties, inviting you to taste the essence of each one of them.

The Valdivieso Varietals are excellent wines for every day use.
